DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The factual inquiries set forth in *Graham* **v.** *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-33, 38 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shiota et al. in view of applicants' admitted prior art (page 2, lines 11-15 and page 13, lines 14-22.

Shiota et al. disclose a photo finishing lab including a plurality of image obtaining devices (scanner 4 and digital camera via a cable interface 5 or a card reader 6), a plurality of output devices (printer, MO disc drive and ZIP drive), associating each image with ID data (col. 4, lines 30-31 and 49-58), creating batches from multiple orders in the buffers (col.5, lines 18-29), providing a product from the output devices and combining the image product with related output (col. 5, line 26). Shiota et al. do not teach analyzing images and comparing the analyzed images with reference image data representative of an optimum image. However, as noted in applicants' admitted prior art, such a process using a computerized system is notoriously well known in the art. Accordingly, to provide the system of Shiota et al. with a processor that analyzes the images and compares the analyzed images with reference image data representative of an optimum image, as taught by the admitted prior art, would have been obvious for one having ordinary skill in the art at the time of the invention. The motivation for such a change would have been an improved photoproduct for the customer as well as a more efficient photo processing system.

With respect to claims 7 and 20, to provide magnetic data on the film would have been obvious for the skilled artisan, since such a feature is a well-known expedient in the digital photo processing art.

With respect to the phrase, "to create an optimized image", the examiner takes Official Notice that such a process is notorious well known in the photo development field. Accordingly, to add such a process to Shiota et al. would have been obvious for

one having ordinary skill. The motivation for such a change would have been to provide the customer with the best possible print.

Response to Arguments

Applicant's arguments filed February 28, 2005, have been fully considered but they are not persuasive.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988)and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
